ABOUT ME

As a Full Stack Web Developer with 3+ years of experience, I have contributed to building, maintaining, and optimizing web applications. Committed to continuous learning, technical growth, and contributing to company success.

TECHNICAL SKILLS

Programming Languages:	JavaScript, Typescript, HTML, CSS,
Frontend Frameworks:	Vue.js, React.js, Next.js, Shadcn UI, TailwindCSS
Backend Technologies:	Node.js, Express.js, Firebase
Databases:	PostgreSQL, Firestore
Tools and Technologies:	VS Code, DBeaver, Postman, Bitbucket, Git Processes, Jira, Trello, Odoo, Figma and Canva

WORK EXPERIENCE

Mid-Backend Developer

Asti Business Services, Inc.

January 2026 - September 2026 | Contractual

- Contributed to the development and maintenance of a web-based ticketing and workflow management system for user requests, approvals, and status tracking.
- Optimized ticket data retrieval by implementing server-side filtering and pagination, reducing unnecessary data loading on the client side.
- Implemented new features and bug fixes based on business requirements, improving system functionality and user experience.
- Assisted administrators in configuring approval flows, workflow statuses, automations, and system features after development.
- Collaborated with developers, managers, and QA teams during testing, troubleshooting, and delivery of feature updates.

Frontend Web Developer

NuWorks Interactive Labs, Inc.

June 2025 - August 2025

- Contributed to the development of a React-based web application from scratch, gaining experience with TypeScript and modern UI component libraries.
- Implemented a mobile-first, responsive design to ensure an optimal user experience across devices.
- Collaborated with frontend and backend teams, as well as the project manager, to deliver bug fixes and implement new features based on requirements.
- Translated Figma designs into fully functional and visually consistent application interfaces.

Junior Full Stack Web Developer

Journeytech Inc.

November 2022 - March 2025

- Developed and deployed web features for an Automated Fare Collection System (AFCS) to display and manage transportation transaction data.
- Developed and maintained RESTful APIs and optimized SQL queries to efficiently retrieve and serve transaction data as JSON.
- Investigated and resolved technical issues and bugs to improve system stability and performance.
- Collaborated with QA and mobile development teams to troubleshoot issues and ensure seamless data integration across platforms.
- Participated in Agile development cycles, including stand-ups, retrospectives, reviews, and QA activities.
- Documented API endpoints, workflows, and debugging procedures to support team collaboration and maintenance.
